

Sprint 1 : Requirements Gathering Interview Questions

Project Overview and Objectives

- What specific problems or inefficiencies in your current project portfolio management process do you want to address most urgently?
- Can you clarify the specific outcomes or improvements you expect from the new system? Are there any metrics we should focus on?
- How do you define success for this project? What does a “high-quality project outcome” look like in your organization?

Existing Processes and Tools

- Can you walk us through the current process of tracking and managing projects, from assignment to completion?
- What tools or platforms are currently being used to manage projects, and what limitations do you encounter with them?
- Are there any specific data or information that is difficult to track with the current process or tools?

Stakeholders and Clients

- Who are the primary stakeholders in this project? Can you describe their roles and responsibilities in the project management process?
- What is the level of involvement expected from clients (e.g., external organizations, students, staff) in the project management process? How do you currently gather and incorporate client feedback?
- How frequently do clients provide feedback, and what format is most effective for receiving and addressing their input?

Workflow and Automation

- Are there any specific areas within the workflow that you feel could be automated or streamlined to improve efficiency?
- How do you envision the platform being used to track updates and feedback on projects? Are there particular features you would prioritize in this platform?
- Are there any manual tasks in your current process that are particularly time-consuming or prone to errors, which you would like to automate?

Collaboration and Communication

- How will your team collaborate with us throughout the project? Who will be the main point of contact for feedback and clarification during the development process?
- What are your expectations for regular check-ins, and how often would you like us to provide progress updates or reports?

Documentation and Final Deliverables

- Can you clarify what format you would like the final documentation to be in (e.g., written reports, user guides, system manuals)?
- What is your preferred method of delivering the final solution? Would you prefer a web-based platform, or is there another format that would work better for your team?
- Are there any specific guidelines or templates you would like us to follow for documentation or deliverables?
